

HAZARDOUS MATERIALS MANAGEMENT provides specific information for the safe handling and disposal of a wide range of hazardous materials, such as chemical waste, infectious waste materials, asbestos and radiological materials

HAZARDOUS MATERIALS MANAGEMENT

- Asbestos
- Chemical Inventory management System (CIMS)
- Chemical Safety
- Chemical Waste Pickup Requests
- Hazardous Materials Shipping
- Infectious Waste Pickup Scheduling
- Mercury Thermometer Exchange Program
- Pesticide Management Program
- Infectious Waste Pickup Scheduling
- Lead-based Paint Abatement
- Pesticide Management Program

Hazardous materials are a necessary part of research and teaching at Alabama A & M University. Such materials include hazardous chemicals, infectious materials, and radioactive materials. The handling, transportation, and disposal of these materials are strictly regulated by federal, ADEM, ORS, and Alabama A & M University policies, and are closely monitored by EHS to protect the environment from improper management.

Considerations Related to the Handling and **Disposal of Hazardous Materials**:

1. Chemical waste disposal procedures
2. Scheduling and performing chemical waste pickups
3. Radiation waste pickup
4. Redistribution of Surplus Chemicals
5. Hazardous waste shipping
6. Biohazardous waste handling and disposal
Managing hazardous material spills and releases
