San Marino
Sweden
Switzerland
United Kingdom

Western Pacific Region

American Samos
New Zealand

Australia

If the answer to **any** of the above questions is **YES**, the Alabama Department of Public Health **strongly recommends** that you have a tuberculin skin test to check for latent tuberculosis infection. Alabama A&M University requires you to have a skin test or blood test before coming to campus. Please note: If you previously have had a positive tuberculin skin test or blood test and written documentation of the result, you do not need another test.
