Three Employees Recovering After COVID-19 Results

Alabama A&M University was notified on Monday, August 10, 2020, that three (3) University employees tested positive for COVID-19. Although each of the individuals is asymptomatic, they are self-quarantining and contact tracing procedures have begun. The appropriate building managers and supervisors have been informed to ensure that possible impacted areas remain isolated until a negative test is received. Aramark Facilities has been notified to provide the proper cleaning.

While the employees tested positive during the incubation period following Commencement Exercises on Friday, July 31st, we encourage all individuals to follow the Centers for Disease Control and Prevention guidelines regarding self-monitoring of symptoms, frequently washing hands, and notifying your medical provider should you receive symptoms.
