### POA-23-RI-001: *Knowledge Graphs for Reasoning*

Submission Deadline: January 11, 2023 5PM EST

#### Description:

Knowledge Graphs capture information about entities and the relationships between those entities, represented as nodes and edges within a graph. Entities can be comprised of objects, events, situations, or concepts. Knowledge Graphs are typically constructed from various data sources with diverse types of data, creating a shared schema and context for formerly disparate pieces of data. As such, Knowledge Graphs provide a rich source of information, enabling capabilities like question and answering systems, information retrieval, and intelligent reasoning. Knowledge Graphs have been used to great success through companies like Google for internet search engine results, Amazon for product recommendations, and financial institutions for fraud prevention. Of interest to the Air Force are Knowledge Graphs that enable situational awareness, pattern of life analysis, and threat detection.

**This is a limited submission. An institution may submit only ONE proposal as a lead.**

An MRI proposal may request from NSF up to \$4 million for either acquisition or development of a research instrument. Each performing organization may submit in *revised* "Tracks" as defined below, with no more than two (2) submissions in Track 1 and no more than one (1) submission in Track 2. For the newly defined Track 3, no more than one (1) submission per competition is permitted. ***As a result, it is now possible for an institution to submit up to four MRI proposals within the Track limits as described above.***

- Track 1: Track 1 MRI proposals are those that request funds from NSF greater than \$100,000<sup>1</sup> and less than \$1,400,000.
- Track 2: Track 2 MRI proposals are those that request funds from NSF greater than or equal to \$1,400,000 up to and including \$4,000,000.
- Track 3: Track 3 MRI proposals are those that request funds from NSF greater than or equal to \$100,000<sup>1</sup> and less than or equal to \$4,000,000 that include the purchase, installation, operation, and maintenance of equipment and instrumentation to conserve or reduce the consumption of helium. ***Institutions may submit no more than one Track 3 proposal. Submission of a Track 3 proposal does not impact limits that apply for Track 1 and Track 2 proposals.***

**This is a limited submission. An institution may submit only ONE proposal as a lead.**

An MRI proposal may request from NSF up to \$4 million for either acquisition or development of a research instrument. Each performing organization may submit in *revised* "Tracks" as defined below, with no more than two (2) submissions in Track 1 and no more than one (1) submission in Track 2. For the newly defined Track 3, no more than one (1) submission per competition is permitted. ***As a result, it is now possible for an institution to submit up to four MRI proposals within the Track limits as described above.***

- Track 1: Track 1 MRI proposals are those that request funds from NSF greater than \$100,000<sup>1</sup> and less than \$1,400,000.
- Track 2: Track 2 MRI proposals are those that request funds from NSF greater than or equal to \$1,400,000 up to and including \$4,000,000.
- Track 3: Track 3 MRI proposals are those that request funds from NSF greater than or equal to \$100,000<sup>1</sup> and less than or equal to \$4,000,000 that include the purchase, installation, operation, and maintenance of equipment and instrumentation to conserve or reduce the consumption of helium. ***Institutions may submit no more than one Track 3 proposal.***

## This document includes the current and the previous 1-2 Funding Opportunities Bulletins.

### WEBINARS and CONFERENCES

Dear Colleagues:

The National Science Foundation (NSF) Major Research Instrumentation (MRI) Activity serves to increase access to multi-user scientific and engineering instrumentation for research and training in our Nation's institutions of higher education and for not-for-profit scientific/engineering research organizations. MRI supports the acquisition or development of a multi-user research instrument that is, in general, too costly and/or not appropriate for support through other NSF programs. MRI is a Foundation-wide Program to fund instruments generally in the range from \$100,000 up to and including \$4 million (see solicitation for exceptions). Recently, solicitation NSF 23-519 was published for the MRI program. The deadline for proposals is February 21, 2023.

On Thursday, December 15, 2022 NSF will host an outreach townhall with information about the latest MRI funding opportunity. This session will be very similar to those held on December 7 and 8, with the addition of an overview of the submission process on Research.gov, now that Fastlane will be retired. In this session we plan to address questions and promote participation from the HBCU research community. The session will begin at 1:00 p.m. EST and have three parts: 1) Session 1: a general MRI information session (1:00 p.m. -1:25 p.m. EST), followed by, 2) Session 2: submitting proposals through research.gov (1:25–1:45 p.m. EST), and 3) a Question and Answer Session.

**Please register for the Town Hall (required) [here](#)**

- Please enter your name, organization, and email address.
- Click on the “Register” tab at the bottom of the page.
